

Limited Warranty:

All new ZAP Controls components are warranted to the original purchaser for one (1) year from the date of installation against defects in either material or workmanship provided the equipment has been installed by an experienced installer. Although the warranty is for one year from the date of installation, any defective goods must be received at the factory within eighteen (18) months after the shipping date from the manufacturing facility, thus allowing up to six (6) months for shelf life and transportation times.

Warranty will not be allowed on wearing components (belts/bearings) and Batteries 120 days after installation.

No products will be warranted that have been used outside the scope of the most current sizing application recommendations put forth by ZAP Controls.

Merchandise may not be returned unless an RGA has been authorized by ZAP Controls and has previously received in writing. The material returned under such authority will be subject to our regular inspection. Material, in-warranty, and found to be defective will be credited to the distributor. No back charges for field labor, transportation or expenses will be allowed. ZAP Controls will not be liable for consequential damages as a result of incorrect installation, operation or specification.

No warranty is expressed or implied except those specifically stated
